## Projects

### • Book Donation System

Mozilla Open Leaders

<http://bit.ly/2YS3gzO>

Building a Book Donation system which will help people to request the donation for their schools and for NGOs. It will help people to get educated no matter where they live.

### • Safety Whistle

CityApp Appathon

<http://bit.ly/2TbdH0p>

Safety Whistle App is safety App which is focused on public safety. Main concept of this App is that if any individual is in problem then this app in a click can send an SMS and location to their family and friends. This app is able to track nearest police station and hospitals in emergency.

### • Cli-Info

Imagine Cup Global challenge

<http://bit.ly/2TbdH0p>

This is a Windows App which helps farmer to notify about weather and help them grow better crops.

### • Energy Efficient decision making for mobile cloud offloading

College Final Year Project

Worked with an IEEE paper and converted idea in to reality. This project is all about saving energy and processing cycles which is utilized by the phones. By offloading heavy computations to cloud energy can be saved.

### • Immune Your Child

ChildApp Appathon

Developed a Windows App which helps parents track their child health and notify about different vexation on time.

---
